Application	Walkover recommend that Moss Treatment is applied in two half strength applications, sprayed firstly North-South; then East-West. Apply first half, then the second half 3 days later. Scarify the treated area after application has been completed and the moss has turned black.					Use every 4-6 weeks April - Sept. Re-apply if weeds persist.	Apply from September onwards. Re-apply for thorough conditioning	Nutrient Rich Seaweed. Treats moss & nourishes soil for root growth.	For Heavier Moss Growth: 6% Liquid Iron. Apply as necessary Spring & Autumn.	Seaweed & micro nutrients. Use every 4-6 weeks March - November	Excellent kick start for lawns to encourage strong turf growth.
