Welcome to the Green Machines

Welcome to the Green Machines... Celebrating 20 years in Professional Turfcare.

Developed by a professional groundsman, Walkover is the original name in turf spraying equipment. Walkover Sprayers are hand built in the UK to meet the challenging needs of the turfcare professional.

There is no engine, no motor, no battery.

Walkover Sprayers are designed to deliver liquid treatments through a durable pump at a pressure of 1 Bar as you walk forward. The pump is driven by the wheels. The nozzles are calibrated to deliver the correct amount of treatment quickly and efficiently.

A proven product with professionals and gardening enthusiasts alike.

For all fine turf and professional grass areas:- Golf greens and tee-off areas; allotments, bowling greens, cricket squares, sports tracks, pathways, lawns, paddocks and driveways, block paved and shingle.

The sprayer sprays when you walk forward. When you stop – the spraying stops!

How quickly can you walk the length of your lawn? That's how fast you can feed and weed your lawn with a Walkover Sprayer.

Walkover Online for Sprayers, Spares and Treatments.

On our new website you will find a wealth of useful information about our sprayers and spraying advice. You can also download information charts showing what types of treatments to spray and when best to use them. We also invite our loyal customers to post their comments about best products and best practice, so please visit us online.

The Walkover Sprayer Lance

Responding to requests from many loyal customers, we have introduced this highly functional pump – action spray lance.

Made from high quality brass with solid wood hand grips, the lance can be attached to your existing Greenkeeper or Turfmaster sprayer.

This means that new customers as well as those who already own a sprayer can obtain this product as an attachment.

The 2½ metre spiral hose fastens to your existing tank drain valve as a simple screw-in.

The spray lance allows plenty of reach into awkward or high areas such as around bushes and trees, even watering hanging baskets. And it's designed to stay discretely out of your way when pushing the Walkover sprayer.

Welcome to the Green Machines

TREATED SPRAY WIDTH	91cms
TANK CAPACITY	25 Litres
WEIGHT FULL	41Kg
FULL TANK SPRAY AREA	669 sq metres
SPRAY TIME PER TANK	12 minutes

 Rambler

Maxicrop Treatments

Moss Killer 10 Ltr

- Natural seaweed extract with ferrous sulphate
- Use March to September
- Kills moss quickly and efficiently
- Greens up grass – without excessive growth
- Hardens off turf

Triple Seaweed 10 Ltr

- Highly concentrated seaweed tonic for lawns and all garden plants
- Use monthly on lawns February to October, alongside an existing fertiliser program
- Encourages rooting
- Enhances green leaf colour
- Improves plant health, drought and stress resistance and turf wear recovery

Fine Turf Lawn Fertiliser 10 Ltr

- Natural seaweed extract with additional fertiliser (12% nitrogen and 6% potash)
- Use monthly from March to September
- Encourages rooting
- Enhances green leaf colour
- Improves plant health, drought and stress resistance and turf wear recovery
- Discourages thick-leaved weed grasses

Sequestered Iron 10 Ltr

- Seaweed extract plus sequestered iron
- Helps prevent iron deficiency chlorosis (leaf yellowing) in acid-loving plants and shrubs, such as azaleas, rhododendrons and camellias

Complete Garden Feed 10 Ltr

- Natural seaweed extract with a balanced ratio of added nitrogen (5%) phosphate (5%) and potash (5%)
- Ideal for use all round the garden, for better rooting and establishment
- Results in beautiful healthy plants and bumper crop yields
- Ideal as an Autumn lawn treatment to aid over-wintering

Original 10 Ltr

- Natural seaweed tonic for all round the garden – **certified for use in organic gardening**
- Use alongside existing fertiliser programs
- Encourages rooting
- Enhances green leaf colour
- Improves plant health, drought and stress resistance

Tomato Fertiliser 10 Ltr

- Natural seaweed extract with added nitrogen (5.9%) phosphate (5.1%) and a high level of potash (6.7%)
- Stimulates plant and tomato growth
- Produces better looking and better tasting tomatoes
- Also ideal for other greenhouse plants and for hanging baskets, patio tubs and bedding plants

Seaweed Meal 25 KG

- Apply 70g per square metre – to encourage fertiliser uptake and increase resistance to pests and diseases
- Excellent compost heap activator – add 1 kg per 100 litres compost
- Improves water holding capacity of potting composts – add 1 kg per 20 kg compost
